

A SOUND FOR EVERYONE

# Thomas/Celebrity Royale 871 with MOOG Preset Synthesizer

A man and a woman are standing next to a Thomas/Celebrity Royale 871 piano. The man is wearing a suit and tie, and the woman is wearing a black dress and a necklace. They are standing in front of a modern building with large columns and a reflecting pool. The piano is a dark wood upright piano with a glass top and a Moog Preset Synthesizer. The background features several bronze statues of human figures in various poses, reflecting in the water. The overall scene is set in a modern architectural environment with a reflecting pool and a building with large columns.

## The Ultimate Thomas

It's all there. Enough sound to fill a concert hall. Enough styling to grace the decor of any home. And all the essential features it takes to make a theatre organ deserving to be called... The Ultimate Thomas.

From a veritable treasure chest of velvet voiced tibias, to the magic and excitement of a preset Moog Synthesizer, the Thomas

namic Moog Synthesizer... it's all there in the Celebrity Royale.

Making all this doubly exciting is the Royale's simplicity of operation. All tabs are easy to reach and easy to understand. With twelve presets plus convenient slide controls, Moog voicing is limited only by your imagination. Six independent percussion voices are yours at the touch of a preset tab. Exciting voices such as vibes,

adds howling winds, crashing thunder, and a variety of other unique effects.

Making the operation of the Celebrity Royale even easier are the unique adjustable pistons for easy and rapid changes in registration without interrupting your playing. Each adjustable piston gives a different combination of voices, with the convenient cancel piston returning all voice tabs to off.

Celebrity Royale 871 will stand for years to come as a milestone to total musical enjoyment.

Create music in any style or mood. Your favorite Bach fugue. Your current pop experience. Or the contemporary rock sounds that are synonymous with the dy-

banjo, piano, and more. Vibra Magic automatically adds classical violin realism to the Celebrity Royale's already unexcelled voicing. And a bass guitar pedal voice, plus an authentic pipe organ Chiff have been added for even greater versatility.

This amazing simplicity is also an inherent part of the Fancy Foot Combo®. Create your own rhythms and accents with Thomas' famous Touch Control, or select from fifteen preset playmate rhythms. In addition, the Royale features a detachable 25 note pedalboard that will play alternat-

In addition, Thomas' unique Arpeggio-Glissando makes playing complex arpeggios easier than ever before. Just strike a chord, run your finger across the rollers, and the Royale 871 does it all for you. In the Glissando position, this same feature

ing bass notes at just the touch of a single pedal.

Surrounding all these versatile sounds are the clean cabinet lines and majestic theatre styling provided by Thomas' master craftsmen. Add a comfortable bench, a gleaming walnut finish, and you're at the controls of one of the most classic musical instruments ever. Equally at home from concert hall to conservatory, backing a choir or blasting off with a rock band, the Celebrities Royale 871 is the perfect choice. Ultimate proof that Thomas does indeed have a sound for everyone.

## Quality . . . A Basic Attitude

At Thomas, quality is not something we say because we feel we have to. It's a basic attitude. It's an attitude which begins at the manufacturing level and permeates our entire organization, touching everyone and everything along the way. But ultimately it must touch you. For you are the one who must be the judge of our quality standards.

Each day we receive an endless variety of component parts. And over the years our suppliers have developed a healthy respect for our quality standards. They know that when we specify only the finest hand picked natural hardwoods, that's exactly what we mean. Noth-

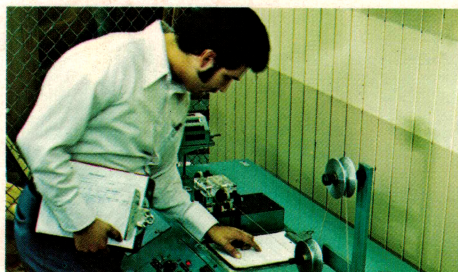

ing less will do. They also know that when we set performance standards for our electrical components, these standards must be met. No compromises.

This uncompromising attitude continues throughout the various production stages until final completion of each unit. Both the master craftsmen in our custom cabinet shop and our trained technicians in assembly are subject not only to scheduled quality control tests, but numerous "unannounced" checks at any moment.

Granted, almost everything we produce is destined for living rooms, dens, and music rooms across the nation. But we keep a few

from each production series and submit them to further testing. These units, which receive up to four thousand hours of vigorous testing in an accelerated life cycle, are subjected to such strains as various amounts of electrical current in addition to near tropical and freezing atmospheric conditions. Again, it's all for one purpose. To assure that each and every product that we produce will provide years of dependable service and enjoyment.

That's the Quality Story from Thomas. Now you know why we say, "Quality is more than just a word, it's a basic attitude." But perhaps even more. At Thomas . . . it's a way of life.
